NIKETHA THAVANESWARAN

COMPUTER SCIENCE UNDERGRADUATE

Jaffna, Sri Lanka | tn.niketha@gmail.com
github.com/tniketha

PROFILE

Computer Science undergraduate at the University of Vavuniya with interests in software development, machine learning, data analysis, and web development. Enjoys solving programming problems, learning new technologies, and applying computing knowledge to real-world problems. Seeking internship and collaborative project opportunities.

EDUCATION

B.Sc. (Hons) Computer Science | Current undergraduate
University of Vavuniya, Sri Lanka
Faculty of Applied Science, Department of Physical Science

Relevant coursework: Programming, Data Structures and Algorithms, Machine Learning, Artificial Intelligence, Computer Architecture, Database Management Systems, System Analysis and Design, Human-Computer Interaction, Computer Graphics, Bioinformatics, Parallel Computing.

TECHNICAL SKILLS

Languages & web: Python, Java, HTML, CSS, PHP, MIPS Assembly, 8086 Assembly
Data & ML: Pandas, NumPy, Matplotlib, Scikit-learn, data cleaning, visualization, classification, model evaluation
Databases: MySQL, SQL, database design, ER/EER diagrams, normalization, CRUD operations
Tools: VS Code, Jupyter Notebook, Google Colab, Git, GitHub, Laragon, Android Studio
Computing: Computer architecture, system analysis and design, Microsoft MPI, CUDA concepts

PROJECTS & EXPLORATIONS

Python DNA Sequence Analyzer | Python, Pandas, Matplotlib
Reads DNA sequences, calculates sequence length and GC content, counts bases, exports results to CSV, and creates visualizations.

Bioinformatics Data Visualization | Python, Pandas, NumPy, Matplotlib
Loads, cleans, and explores biological datasets through category counts, disease-status analysis, bar charts, and basic statistical interpretation.

Candidate Elimination Implementation | Python
Explores concept learning with specific and general boundary calculation, positive and negative example processing, and version-space representation.

MIPS Assembly String Processing | MIPS Assembly
Programs for reading and comparing strings, calculating string length, character processing, loops, and branching.

Digital Attendance Management System - Concept | HTML, CSS, PHP, MySQL
An attendance-management concept where lecturers select present students and remaining students are automatically marked absent.

ACTIVITIES & STRENGTHS

IEEEXtreme 18.0 & 19.0: Programming competition participant
AIESEC: Member
Strengths: Problem solving, analytical thinking, teamwork, communication, self-learning, adaptability, and technical documentation.
