NIKETHA THAVANESWARAN

Final-year Computer Science Undergraduate | Software Engineering & Full-stack Internships

Jaffna, Sri Lanka | tn.niketha@gmail.com

github.com/tniketha | LinkedIn: niketha-thavaneswaran | Portfolio

EDUCATION

University of Vavuniya Sri Lanka

B.Sc. (Hons) Computer Science **Expected June 2027**

Final year | Relevant coursework: Data Structures and Algorithms, Database Management Systems, Computer Architecture, Human-Computer Interaction.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, Python, Java, C

Frontend: React, Next.js, React Native, Expo, HTML, CSS, Tailwind CSS

Backend & databases: Node.js, Express, Fastify, Prisma, PostgreSQL, MongoDB

Tools & practices: Git, GitHub, REST APIs, transactions, unit and integration testing

TECHNICAL PROJECTS

ShopFlow | Retail web application Sole developer

Next.js, React, TypeScript, Tailwind CSS, Fastify, PostgreSQL, Prisma | github.com/tniketha/ShopFlow

- Built a responsive Next.js workspace connecting product management, supplier purchases, cash checkout, stock totals, and sales history through Fastify REST APIs.
- Used serializable PostgreSQL transactions, conditional stock updates, and request keys to prevent overselling and duplicate purchases or sales on retry.
- Enforced store isolation and role permissions; used integer LKR cents and saved product-price snapshots to preserve accurate sale records.
- Added PostgreSQL integration tests for concurrent checkout, repeated requests, insufficient stock, transaction rollback, and access across store boundaries.

Smart Attendance | Web and mobile application Sole developer

React Native, Expo, TypeScript, Express, MongoDB, Prisma | github.com/tniketha/SmartAttendance

- Built React Native and Expo student and lecturer screens backed by an Express API for module-based class creation, QR check-in, and semester attendance tracking.
- Validated QR tokens, active classes, and enrollment timing; used unique attendance records and MongoDB transactions to prevent duplicates and coordinate check-in with class closure.
- Recorded missing students as absent when classes close; calculated completed-class statistics and provided filtered attendance history and lecturer CSV exports.
- Added API integration tests for role restrictions, invalid QR codes, duplicate check-ins, class closure, expiry, semester reports, and logout token revocation.

SELECTED COURSES

Sololearn | Feb 2026: C Intermediate; SQL Intermediate.

COMPETITIONS & ACTIVITIES

IEEE IEEEXtreme: 19.0 (Oct 2025), team DigitalVanguard; 18.0 (Oct 2024), team TheChiefs. Programming competition participant.

AIESEC: Member. **Trailblazers '24:** Professional development participant, AIESEC in University of Peradeniya (Dec 2024).
