TECHNICAL PROJECTS

ShopFlow | Retail web application Sole developer

Next.js, React, TypeScript, Tailwind CSS, Fastify, PostgreSQL, Prisma | github.com/tniketha/ShopFlow

- Built a responsive retail workspace for inventory, supplier purchases, barcode-assisted cash checkout, partial refunds, PDF invoices, and sales reporting.
- Implemented Fastify REST APIs, PostgreSQL transactions, and owner, manager, and cashier permissions to keep stock updates consistent and isolate business data.
- Protected retries with unique request keys and represented amounts in integer LKR cents to prevent duplicate transactions and monetary rounding errors.

Smart Attendance | Web and mobile application Sole developer

React Native, Expo, TypeScript, Express, MongoDB, Prisma, Socket.IO | github.com/tniketha/SmartAttendance

- Built student, lecturer, and administrator workflows using shared React Native and Expo code for web, Android, and iOS.
- Implemented signed, expiring QR check-ins with enrollment validation, duplicate prevention, and optional location checks through an Express API.
- Delivered Socket.IO live rosters with polling recovery, semester-based attendance insights, CSV exports, and audited correction requests.
